The Council of Europe Charter on Education for Democratic Citizenship and Human Rights Education

Learning in education for democratic citizenship and human rights education is a lifelong process. Effective learning in the area involves a wide range of stakeholders including policy makers, educational professionals, learners, parents, educational institutions, educational authorities, civil servants, non-governmental organisations, youth organizations, media and the general public. Adopted in 2010, the charter is an essential document outlining the standards and principles for citizenship and human rights education.
