

Education for sustainable development – UNESCO Green Citizens Project

As the lead UN agency for Education for Sustainable Development, UNESCO has developed, within the framework of the COP21 the UNESCO GREEN CITIZENS, a project consisting of a multimedia platform and a travelling exhibition which aim to highlight the remarkable work of men and women who work every day to transmit best practices to future generations. The “UNESCO GREEN CITIZENS: Pathfinders for Change” exhibition showcases eight emblematic projects on education for sustainable development while the sharing platform allows educators from all around the world to share their best practices. More than 100 project holders have already shared their initiatives.
